

RITIK CHAUDHARY

AI/ML Engineer | Machine Learning & NLP | Data Analytics | Python & Java Full-Stack Development
Mathura, Uttar Pradesh, India | +91-8868891921 | ritikchaudhary36@gmail.com | linkedin.com/in/ritik-chaudhary-210856300

PROFESSIONAL SUMMARY

Software Engineer and aspiring AI/ML Engineer (B.Tech, Information Technology) with hands-on experience in Machine Learning, NLP, Generative AI/LLMs, and data analytics. Proficient in Python, Java, and SQL, with strong foundations in Data Structures & Algorithms, Statistical Analysis, and Agile delivery. Skilled in building AI-driven analytics pipelines and translating complex datasets into actionable business insights — improving process efficiency by up to 40% and delivering measurable client impact across the full SDLC.

TECHNICAL SKILLS

- **Languages:** Java, Python, SQL, C/C++ fundamentals
- **AI & Data Analytics:** Machine Learning, NLP, Generative AI (LLMs, RAG, Prompt Engineering), Scikit-learn, spaCy, TF-IDF, CNN, U-Net, Statistical Analysis, Power BI, Tableau
- **Core Concepts:** Data Structures & Algorithms, OOP, REST API Design, System Design, SDLC, Agile/Scrum, CI/CD basics
- **Frameworks & Tools:** Spring Boot, Spring MVC, Flask, Bootstrap, jQuery, Git/GitHub, Linux, GCP, Jupyter
- **Databases:** SQL, MySQL, Relational Database Design, Query Optimization

PROFESSIONAL EXPERIENCE

Freelance Software Developer | Self-Employed

May 2025 – Present

Remote

- Engineered end-to-end Python/Java REST APIs for web scraping, data extraction, and process automation, cutting manual client effort by an estimated 40%.
- Built and deployed ML-powered NLP data pipelines (Scikit-learn) for sentiment analysis and text classification on unstructured datasets, improving data-driven decision accuracy for clients.
- Owned full SDLC — requirements, system design, coding, testing, deployment, and support — delivering all projects on time with high client satisfaction.
- Collaborated directly with clients using Agile practices to translate business requirements into scalable, production-ready software.

Software Engineer Intern | Cognifyz Technologies

Nov 2024 – Dec 2024

Remote

- Built modular Python applications (CRUD task manager, guessing game, pattern generator) using OOP for reusable, maintainable code.
- Implemented persistent storage via file I/O and object serialization, improving application reliability and data retention.
- Automated data extraction with BeautifulSoup/Requests; maintained a version-controlled codebase with Git and contributed to peer code reviews in an Agile sprint environment.

PROJECTS

AI-Powered Financial Risk & Audit Analytics Assistant — Python, LLM/RAG, Scikit-learn, Power BI

2025

- Designed a Generative AI (LLM + Retrieval-Augmented Generation) prototype to analyze financial statements and audit reports, automatically flagging anomalies and reducing manual document review time by an estimated 35%.
- Built a Python analytics pipeline processing 5,000+ simulated financial transactions using unsupervised ML (Isolation Forest) for fraud and irregularity detection, improving anomaly-detection accuracy by 25% over rule-based checks.
- Developed interactive Power BI dashboards to visualize risk scores and KPI trends across 10+ simulated client portfolios, enabling faster, data-driven audit and advisory decisions.

Resume-JD Matcher & Skill Gap Analyzer — Python, Java, Spring Boot, spaCy, Flask

2024

- Built an NLP application using TF-IDF vectorization and cosine similarity to score resume-to-JD match and surface skill gaps, achieving 90%+ relevance accuracy on test samples.
- Developed a scalable Java Spring Boot REST API backend with a Python Flask microservice for spaCy-based Named Entity Recognition (NER), coordinating inter-service communication in a microservices architecture.

Sentiment Analysis and Modeling — Python, NLP, Scikit-learn

2023

- Built a multi-class text classifier (TF-IDF, n-grams) benchmarking Logistic Regression, SVM, and Naive Bayes via k-fold cross-validation, achieving a 92% F1-score across diverse real-world datasets.

EDUCATION

B.Tech, Information Technology — Noida Institute of Engineering and Technology

Sep 2021 – Jun 2025

Greater Noida, Uttar Pradesh

Higher Secondary — Delhi Public School, Mathura

Apr 2018 – May 2021

Mathura, Uttar Pradesh

ACHIEVEMENTS & CERTIFICATIONS

- Finalist, NIET CodeSprint 2.0 Hackathon (2024) — built a legal chatbot using Java REST APIs and NLP-based intent recognition.
- Open-Source Contributor — bug fixes and documentation for 2 GitHub repositories (Spring Boot, NLP).
- Certifications (Coursera): Databases and SQL for Data Science (IBM); Object-Oriented Programming in Java (UC San Diego).
